

GEOTECHNICAL SPECIAL PUBLICATION NO. 112

SOFT GROUND TECHNOLOGY

PROCEEDINGS OF THE SOFT GROUND TECHNOLOGY CONFERENCE

SPONSORED BY

United Engineering Foundation
The Geo-Institute of the American Society of Civil Engineers

May 28–June 2, 2000
Noordwijkerhout, the Netherlands

EDITED BY
James L. Hanson
Ruud J. Termaat

ASCE *American Society
of Civil Engineers*
1801 ALEXANDER BELL DRIVE
RESTON, VIRGINIA 20191-4400

Contents

Soft Ground Characterization

| | |
|---|----|
| The Dutch Experience with Soft and Soggy Grounds | 1 |
| Frans B.J. Barends | |
| Towards a Kinetic Theory of Clay | 17 |
| Peter Smart | |
| Reduction of Axial Resistance Due to Membrane and Side Drains in the Triaxial Test | 30 |
| Gert Greeuw, Henk den Adel, Aad L. Schapers, and Evert J. den Haan | |
| Settlement Magnitude Sensitivity to OCR Profile in Medium Plasticity Silts | 43 |
| Douglas R. Schwarm | |
| Microstructure of a Chinese Loess from Shanxi Province | 55 |
| Peter Smart and Xiaohong Bai | |
| Shear Tests on Reconstituted Oostvaardersplassen Clay | 67 |
| Jan Tigchelaar, Jan W. de Feijter, and Evert J. den Haan | |
| Soft Soil Engineering in Central Florida | 82 |
| Thomas L. Richardson, Wing Heung, and Gary Kuhns | |
| Calculation of Soft Ground Settlement with an Isotache Model | 94 |
| Evert J. den Haan and Hans J.B. Sellmeijer | |

Soft Ground Stabilization

| | |
|---|-----|
| Deep Mixing | 105 |
| Göran Holm | |
| Combined Soil Stabilization with Vertical Columns (CSV): A New Method to Improve Soft Soils | 123 |
| Paul O. Scheller and Wolfgang Reitmeier | |
| Fiber and Fly Ash Stabilization Methods to Treat Soft Expansive Soils | 136 |
| Anand Puppala, Laureano Hoyos, Chirayus Viyanant, and Chisha Musenda | |
| Case Histories of Rammed Aggregate Pier Soil Reinforcement Construction over Peat and Highly Organic Soils | 146 |
| Nathaniel S. Fox and Tuncer B. Edil | |
| Hydraulic Cement Based Binders for Mass Stabilization of Organic Soils | 158 |
| Ronny Andersson, Torbjörn, and Mikko Leppänen | |
| Ultrasonic Assessment of Stabilized Soils | 170 |
| Nazli Yesiller, James L. Hanson, and Mumtaz A. Usmen | |
| Laboratory Determination of Deformation and Stiffness Parameters of Stabilized Peat | 182 |
| Samir Hebib and Eric R. Farrell | |

| | |
|---|-----|
| Stabilization of Soft Soils by Soil Mixing | 194 |
| Kenneth B. Andromalos, Yasser A. Hegazy, and Brian H. Jasperse | |
| <i>Geosynthetics</i> | |
| Geosynthetic Reinforced Embankments on Soft Foundations | 206 |
| Barry R. Christopher, Robert D. Holtz, and Ryan R. Berg | |
| Geosynthetic Reinforced Full Scale Test Embankment on Soft Soil | 237 |
| G. Mannsbart and K. Oberreiter | |
| The New 'Accelerated Consolidation Method' Combining the Dewatering and Plastic-board-Drain by Floating System (PDF) Methods | 246 |
| Masaaki Kiyama, Akihiko Oshima, Fumiaki Kusakabe, and Kenji Harada | |
| Wick Drain Research at an Illinois Project Site | 259 |
| Richard E. Landau, Mary C. Lamie, and Victor A. Modeer | |
| Determination of Smear Zone Around Vertical Drains | 270 |
| Jitendrapal Sharma and Daping Xiao | |
| Sample Size Effects on the Behavior of EPS Geofoam | 280 |
| Ahmed Elragi, Dawit Negussey, and George Kyanka | |
| An Investigation of Geofoam Interface Strength Behavior | 292 |
| Michael Sheeley and Dawit Negussey | |
| <i>Thermal and Electrical Stabilization</i> | |
| Temperature Effect on the Properties of Clay | 304 |
| Lovisa Moritz and Anna Gabrielsson | |
| Large Scale Application of Artificial Ground Freezing | 315 |
| Peter van Dijk and Jeannette Bouwmeester-van den Bos | |
| Stress-Temperature Effects on Peat Compression | 331 |
| James L. Hanson, Tuncer B. Edil, and Patrick J. Fox | |
| Electrokinetic Dewatering of Eneabba West Mine Tailings: A Laboratory Experimental Study | 346 |
| Julie Q. Shang and Eltayeb Mohamedelhassan | |
| <i>Environmental Aspects of Soft Ground</i> | |
| Construction of Caps over Soft Sludges | 358 |
| Tuncer B. Edil | |
| Remediation Techniques by Use of Ground Improvement | 374 |
| Masashi Kamon | |
| Landfill Construction Through Peat and Organic Silt | 388 |
| James M. Tinjum and Joel V. Schittone | |
| Crust Formation in Disposed Dredgings | 399 |
| Maysaa Khouchkar, M. Şükrü Özçoban, and I. Kutay Özyaydin | |

Embankments and Tunneling

| | |
|---|------------|
| Accelerated Reconstruction of I-15 Through Salt Lake County, Utah, USA..... | 410 |
| Kancheepuram N. Gunalan and William G. Turner | |
| Centrifuge Modeling of Embankment Construction by the Dumping Method on Soft Soil | 423 |
| Henderikus G.B. Allersma, Seung-Won Lee, and Young-Nam Lee | |
| Comparison of Laboratory Predictions Versus Field Performance of Embankments over Soft Ground | 435 |
| Eric R. Farrell | |
| Evaluation of Test Embankment on Organic Soil Reinforced by Cement-Stabilized Soil Columns - Hoeksche Waard, Netherlands | 445 |
| Evert J. den Haan, Hein L. Jansen, Benno A.N. Koehorst, and Bob R.F. Woldringh | |
| Multi-shield Excavation for a Large Rectangular-shaped Tunnel | 460 |
| Maulidya Indah Junica, Domon Tsuyoshi, and Nishimura Kazuo | |
| Soil Improvement at the Botlek Railway Tunnel Project, Rotterdam, The Netherlands | 472 |
| Ad C. Vriend, Peter J.C.M. de Kort, and Eckart Colmorgen | |

Laboratory and Field Site Visits

| | |
|--|------------|
| Laboratory and Field Site Visits..... | 485 |
