

International Workshop on  
**DAM SAFETY  
EVALUATION**

Grindelwald, Switzerland, 26-28 April 1993

Sponsored by the international journal  
***Dam Engineering***

Co-sponsored by the  
***International Commission on Large Dams***

**VOLUME 2**

**SESSIONS 5-8**

Edited by  
H. Kreuzer, R. Dungar  
and R. Taylor

# INDEX: VOLUME 2

## Session 5: Static loading - Concrete dams

- 1 G Guisèppetti, G Mazzà, P Bonaldi and G Ruggeri - Traditional versus advanced mathematical modelling for concrete dams
- 15 H R Gaisbauer, H P Rossmanith and A R Ingraffea - Impact of valley form and fracture zones in the upstream heel on the bearing behaviour of an arch dam
- 29 C Pina, C P Costa, S Oliveira and J P Gomes - Safety evaluation of a cracked arch dam
- 41 R Bremen, G Bonfigli, M Dolcetta Capuzzo and G Lombardi - Reassessment and rehabilitation of San Giacomo di Fraele dam
- 49 C Oosthuizen - Behaviour of roller compacted concrete in arch/gravity dams

## Session 6: Seismic loading - Loading and basic models

- 59 A Carrère, B Tardieu and O Ozanam - Use and misuses of realistic numerical models in dam safety evaluation
- 87 A Chopra and J Tan - Dam-foundation interaction in earthquake analysis of arch dams
- 97 R Tinawi and L Guizani - Seismic hydrodynamic pressure inside cracks in concrete gravity dams
- 109 M Cervera, M Galindo and J Oliver - Towards seismic evaluation of concrete dams including dam-fluid interaction
- 121 J P Wolf and A Paronesso - Classification of analysis methods for seismic reservoir-dam interaction

## Session 7: Seismic loading: Embankments and basic models

- 133 P Martin, A Sengupta and J A Niznik - Prediction of static and dynamic deformation response of Blue Ridge dam, Georgia/USA
- 149 G Bureau - Seismic safety evaluation of Priest dam, California/USA
- 161 R Crouch and J P Wolf - A unified modular constitutive model for soil under seismic load

## Session 8: Seismic loading - Concrete dams

- 173 M Wieland, V Lotfi and T Arasteh - Seismic safety evaluation of 200 m-high arch dam under maximum credible earthquake
- 185 R Dungar - Linear versus nonlinear seismic safety evaluation
- 199 V Milovanovitch - Optimization of the dam position in the seismic analysis
- 217 P Leger, S S Bhattachargee and J Venturelli - Seismic analysis of concrete gravity dams considering severe seasonal temperature variations
- 229 G Bureau - Seismic safety of intake/outlet towers
- 241 S J Pietrzko - Exciter placement for the model testing of a gravity dam
- 253 Y Deger, R Cantieni and S J Pietrzko - Modal analysis of a concrete gravity dam - FE modeling versus experiment
