

PROCEEDINGS OF THE 2ND INTERNATIONAL SYMPOSIUM ON FIELD  
MEASUREMENTS IN GEOMECHANICS / KOBE / 6-9 APRIL / 1987

# FIELD MEASUREMENTS IN GEOMECHANICS

*Edited by*

S.SAKURAI

*Kobe University, Japan*

VOLUME TWO

4 *Underground openings*

5 *Waste disposal problems*

6 *Interpretation of field measurement results*

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988

INSTITUTION OF ENGINEERS AND ARCHITECTS  
PUBLISHED BY THE INSTITUTION OF ENGINEERS AND ARCHITECTS

# FIELD MEASUREMENTS IN GEOTECHNICAL ENGINEERING

Edited by  
S. SAKURAI  
Kobe University, Japan

VOLUME TWO  
4. Underground openings  
5. Waste disposal problems  
6. Transportation of field measurement results

*The texts of the various papers in this volume were set individually by typists under the supervision of each of the authors concerned.*

Published by

A. A. Balkema, P.O. Box 1675, 3000 BR Rotterdam, Netherlands

A. A. Balkema Publishers, Old Post Road, Brookfield, VT 05036, USA

For the complete set of two volumes ISBN 90 6191 778 6

For volume 1: ISBN 90 6191 750 6

For volume 2: ISBN 90 6191 751 4

## Table of contents

### 4 Underground openings

The understanding of measured changes in rock structure, in situ stress and water flow caused by underground excavation <i>J.A.Hudson</i>	605
Integration of field instrumentation and computer simulation: Development and application of the SPDR method <i>Shosei Serata</i>	613
Field study of rock damage around a gallery <i>P.Egger</i>	625
Performance and results of geomechanical measurements in a rock salt gallery <i>M.Haupt &amp; O.Natau</i>	635
Study on the permeability change of rock mass due to underground excavation <i>I.Motojima</i>	645
Río Grande I tailrace tunnel monitoring <i>Roberto I.Cravero, Raúl E.Sarra Pistone &amp; Juan C.del Río</i>	657
Río Grande I powerhouse cavern monitoring <i>R.Sarra Pistone, R.Cravero &amp; S.Sakurai</i>	669
Stability of a large scale egg-shaped cavern <i>S.Hibino &amp; M.Motojima</i>	683
Construction stage instrumentation for the underground openings of Tehri dam complex <i>V.K.Mehrotra</i>	693
Field measurement of Washuzan Tunnel <i>Yasuji Saeki, Kakuo Takeuchi &amp; Shinichi Ooe</i>	703
Deformabilities of rock mass around an underground mine roadway by in-situ measurements <i>Yoshihiro Ogata, Yasuo Tomishima, Yuichi Nishimatsu &amp; Seisuke Ohkubo</i>	713

New developments in stress measurements for the design of underground openings <i>B.C.Haimson</i>	723
Possibilities for prognosticating state of stress around underground openings on the basis of automated mapping <i>R.Parashkevov, E.Andonov &amp; U.Dimitrov</i>	741
Rock stress and AE activity in Miike Coal Mine <i>Katsuhiko Sugawara, Katsuhiko Kaneko &amp; Yuzo Obara</i>	749
Evaluation of the stress state of cast-in-place underground structures by a FEM analysis and 'in situ' measurements <i>V.S.Ivanov, V.H.Vassilev &amp; R.D.Parashkevov</i>	759
The phenomena, prediction and control of rockburst in some Chinese underground engineering <i>Mei Jianyun &amp; Lu Jiayou</i>	765
Study on smooth blasting in hard granite tunnels using an automatic drilling machine based on field measurements <i>Ken-Ichi Yoshimi, Masayuki Suzuki, Kohei Furukawa &amp; Koji Nakagawa</i>	781
In-situ loading test of coal seams with respect to the problem of rock burst hazard <i>Jacob A.Bich, Ilya A.Feldman &amp; Alexander B.Fadeev</i>	789
Observation of ground movements caused by tunnelling <i>E.J.Cording</i>	799
Discontinuous deformational behaviour of soft rocks due to tunnel excavation Field measurements of Shioyadanigawa Flood Control Tunnel <i>T.Sugano, A.Shigeno, K.Suenaga, Y.Okabe, O.Sugita &amp; S.Sakurai</i>	821
Measurement and monitoring in a tunnel excavated in detritus soil ground with thin overburden, behavior of ground, and effect of supporting members Tomari Tunnel of Hokuriku Expressway <i>T.Kawata &amp; K.Tanii</i>	833
Deformation monitoring and analyses on a shallow railway tunnel in a loess stratum <i>Weishen Zhu, Jiaoqiao Zhu &amp; Caizhao Zhan</i>	843
The monitoring of a tunnel excavated in shallow depth <i>H.Noami, S.Nagano &amp; S.Sakurai</i>	851
Field measurements of the Kobe Municipal Subway Tunnel excavated in soil ground by NATM <i>S.Sakurai &amp; R.Izunami</i>	861

An example of measurements on the behavior of oblate and large section tunnel in unconsolidated ground <i>Yukio Yamashita &amp; Toshio Fujiwara</i>	871
Field measurements at a multiple tunnel interaction site <i>K.W.Lo, L.K.Chang, C.F.Leung, S.L.Lee, H.Makino &amp; T.Mihara</i>	881
The results of the tunnel crossing intersection measurements under different conditions <i>Nobuhiro Fukao &amp; Tsuguo Takebayashi</i>	891
Breakage face measurement and ways of improving coal seam stability <i>Ju.A.Veksler, E.P.Bragin, G.M.Present &amp; S.A.Chesnokol</i>	901
Adaptability of convergence forecasting method for controlling tunnel construction <i>Jun'ichi Seki, Masayuki Okada, Hiroyuki Inoue &amp; Toshihiko Miwa</i>	907
Countermeasures for ground displacement in earth pressure balance shield tunnelling <i>W.Miyazaki, T.Hatakeyama &amp; M.Komori</i>	917
Development of tunnel data bank system <i>Toshihiro Asakura</i>	927
<i>5 Waste disposal problems</i>	
Progress of the Swedish radioactive waste management program <i>Hans S.Carlsson</i>	937
In situ testing programme related to the mechanical behaviour of clay at depth <i>B.Neerdael, D.De Bruyn, M.Voet, R.André-Jehan, M.Bouilleau, J.F.Ouvry &amp; G.Rousset</i>	951
Geomechanical instrumentation applications at the Canadian underground research laboratory <i>P.M.Thompson &amp; P.A.Lang</i>	963
Generic technical position on in situ testing during site characterization for high-level nuclear waste repositories <i>Mysore S.Nataraja</i>	985
Observation of the spreading of a fracture during and after hydraulic fracturing tests <i>W.R.Fischle, G.Kappei, Th.Meyer, M.W.Schmidt, K.Schwieger, E.Taubert, K.Thielemann &amp; J.Eisenblätter</i>	995
Instrumentation for nuclear waste studies in salt <i>Frank S.Shuri &amp; Gordon E.Green</i>	1007

FE coupled process analysis of buffer mass test in Stripa project <i>Yuzo Ohnishi &amp; Akira Kobayashi</i>	1019
A new technique for measuring evaporation from the ground surface <i>Kunio Watanabe, Hidehiro Tamaki &amp; Shoichi Matsushima</i>	1027
Field measurement techniques applied to slurried fine grained coal mine tailings <i>David J. Williams &amp; Peter H. Morris</i>	1037
 <i>6 Interpretation of field measurement results</i>	
Interpretation of plate-loading tests in tunnels <i>T. Rotonda</i>	1049
The back-analysis method from displacements for viscoelastic rock mass <i>Wang Sijing, Yang Zhifa &amp; Xue Ling</i>	1059
Determination of rock mass strength through convergence measurements in tunnelling <i>Chikaosa Tanimoto, Toshio Fujiwara, Hisaya Yoshioka, Koji Hata &amp; Kazutoshi Michihiro</i>	1069
Displacements and strains around a non-flat-end borehole <i>S. Kobayashi, N. Nishimura &amp; K. Matsumoto</i>	1079
A preliminary assessment of correct reduction of field measurement data: Scalars, vectors and tensors <i>C. G. Dyke, A. J. Hyett &amp; J. A. Hudson</i>	1085
Determination of elasto-plastic parameters by an inverse analysis method as a boundary control problem <i>Y. Ichikawa, T. Kyoya &amp; T. Kawamoto</i>	1097
Determination of stresses and strain modulus in a rock mass by an experimental-analytical method <i>N. P. Vlokh, A. V. Zoubkov &amp; Yu. P. Shoupletsov</i>	1105
A method of measuring and computing the deformation of a rock block with large displacement and strain <i>Guo Jing Zhao</i>	1113
Prediction of dam leakage with Kalman filtering and a safety assessment for dams <i>Akira Murakami &amp; Takashi Hasegawa</i>	1121
A comparative evaluation of some back analysis algorithms and their application to in situ load tests <i>Giancarlo Gioda, Anna Pandolfi &amp; Annamaria Cividini</i>	1131

Observational procedure of earth wall structures <i>Kazuo Furuya &amp; Yoshihiro Ito</i>	1145
Interpretation of the results of displacement measurements in cut slopes <i>S.Sakurai</i>	1155
Open excavation with the aid of rockbolts and shotcrete <i>Shunsuke Sakurai, Toshihiko Okamoto, Akira Nakano &amp; Koichi Ono</i>	1167
Measurement and interpretation of loading tests of concrete top blocks on soft ground <i>Katsuhiko Arai, Yuzo Ohnishi, Masakuni Horita &amp; Ikuo Yasukawa</i>	1177
The normalization and compatibility of the micro-macro parameters in the laboratory- in situ comprehensive measurements <i>Tsui Zheng Chuan</i>	1185
Supervision of a tunnel using FEM back-analysis based on field measurements <i>Koichi Fujino &amp; Kouichi Suzuki</i>	1197
Analytical estimation of tunnel deformation based on field measurements <i>H.Kunimi &amp; H.Takasaki</i>	1207
Assessment of tunnel face stability by back analysis <i>M.Hisatake</i>	1217
Technique of field measurement interpretation in erecting underground openings of round section <i>N.S.Bulychev &amp; I.I.Savin</i>	1225
Analysis of plastic zone around underground openings <i>Xu Wen-Huang &amp; Huang Zheng</i>	1231
Assessment of the stability of the ground surrounding a shallow tunnel by means of a back analysis method of measured displacements <i>Kaiei Sakaguchi, Tatsutoshi Kondoh, Yukihiro Okabe &amp; Masato Shinji</i>	1237
Stability assessment of the ground around a shallow tunnel <i>K.Kimura</i>	1247
Development of a computer aided design and analytical system for geotechnical characterization problems using coupled FE-BE program <i>John L.Meek &amp; Shinichi Akutagawa</i>	1257
Ground movements caused by tunnelling <i>E.W.Brand</i>	1267
Author index	1269
