

*Multipurpose Dams in Japan*

*State of the Integrated River Development Projects*

*MAY 1984*

*River Development Division, River Bureau, Ministry of Construction*

# CONTENTS

I. Dams in Japan	
1. General	1
2. History of Dams	2
3. Projects Executed by the Ministry of Construction	6
(1) Achievements and Present Situation of the Integrated River Development Projects	6
(2) Diversification of the Integrated River Development Projects	7
II. Dam Legislation in Japan	
1. General	9
2. Legislation on Dam Construction	9
(1) River Law	9
(2) Specified Multipurpose Dam Law	9
(3) Water Resources Development Promotion Law and Water Resources Development Public Corporation Law	10
3. Legislation for Promoting Dam Construction	10
(1) Act on Special Measures for the Comprehensive Development of Lake Biwa	10
(2) Act on Special Measures for the Reservoir Area Development	11
4. Technical Criteria for Dams	11
(1) Cabinet Order Concerning Structural Criteria for River Operation Facilities, etc.	11
(2) Technical Criteria for River Works	14
(3) Others	14
III. System and Organization of Dam Construction in Japan	16
1. System of Dam Construction	16
2. Ministry of Construction	18
(1) Organization of Ministry of Construction	18
(2) Role of River Development Division of River Bureau	19
(3) Role of Public Works Research Institute	20
(4) Dam Technology Council	22
3. Organization and Role of Water Resources Development Public Corporation	22
4. Japan Dam Engineering Center	24
5. Others	25
IV. Characteristics Related to Dam Projects and Technical Measures	26
1. Characteristics	26
(1) Natural Characteristics	26
(2) Social Characteristics	31
(3) Geological Characteristics of dam sites	35
2. Technical Measures	39
(1) Surveys	39

(2) Planning .....	42
(3) Design .....	54
(4) Construction .....	65
(5) Operation and Maintenance .....	69
3. Countermeasures for Social and Environmental Impacts .....	74
(1) Countermeasures for Social Impacts .....	74
(2) Countermeasures for Environment Impacts .....	74
V. Major Dams .....	81
