MILANO

VOLUME 88 NO. SM6
DECEMBER 1962
PART 1

JOURNAL of the
Soil Mechanics
and Foundations
Division

PROCEEDINGS OF THE

**AMERICAN SOCIETY
OF CIVIL ENGINEERS**

BASIC REQUIREMENTS FOR MANUSCRIPTS

Original papers and discussions of current papers should be submitted to the Manager of Technical Publications, ASCE. Authors should indicate the technical division to which the paper is referred. The final date on which a discussion should reach the Society is given as a footnote with each paper. Those who are planning to submit material will expedite the review and publication procedures by complying with the following basic requirements:

1. Titles must have a length not exceeding 50 characters and spaces.
2. A summary of approximately 50 words must accompany the paper, a 300-word synopsis must precede it, and a set of conclusions must end it.
3. The manuscript (an original ribbon copy and two duplicate copies) should be double-spaced on one side of 8½-inch by 11-inch paper. Three copies of all illustrations, tables, etc., must be included.
4. The author's full name, Society membership grade, and footnote reference stating present employment must appear on the first page of the paper.
5. Mathematics are recomposed from the copy that is submitted. Because of this, it is necessary that letters be drawn carefully, and that special symbols be properly identified. The letter symbols used should be defined where they first appear, in the illustrations or in the text, and arranged alphabetically in an Appendix.
6. Tables should be typed (an original ribbon copy and two duplicate copies) on one side of 8½-inch by 11-inch paper. Specific illustrations and explanation must be made in the text for each table.
7. Illustrations must be drawn in black ink on one side of 8½-inch by 11-inch paper. Because illustrations will be reproduced with a width of between 3-inches and 4½-inches, the lettering must be large enough to be legible at this width. Photographs should be submitted as glossy prints. Explanations and descriptions must be made within the text for each illustration.
8. The desirable average length of a paper is about 12,000 words and the absolute maximum is 18,000 words. As an approximation, each full page of typed text, table, or illustration is the equivalent of 300 words.
9. Technical papers intended for publication must be written in the third person.
10. The author should distinguish between a list of "Reading References" and a "Bibliography," which would encompass the subject of his paper.

Reprints from this Journal may be made on condition that the full title, name of author, name of publication, page reference, and date of publication by the Society are given. The Society is not responsible for any statement made or opinion expressed in its publications.

This Journal is published bi-monthly by the American Society of Civil Engineers. Publication office is at 2500 South State Street, Ann Arbor, Michigan. Editorial and General Offices are at United Engineering Center, 345 East 47th Street, New York 17, N.Y. \$4.00 of a member's dues are applied as a subscription to this Journal. Second-class postage paid at Ann Arbor, Michigan.

The index for 1961 was published as ASCE Publication 1962-10 (list price \$2.00); indexes for previous years are also available.

Journal of the
SOIL MECHANICS AND FOUNDATIONS DIVISION
Proceedings of the American Society of Civil Engineers

SOIL MECHANICS AND FOUNDATIONS DIVISION
EXECUTIVE COMMITTEE

John Lowe, III, Chairman; Wesley G. Holtz, Vice Chairman;
Reginald A. Barron; Bramlette McClelland; H. Bolton Seed, Secretary
Leland J. Walker, Board Contact Member

COMMITTEE ON PUBLICATIONS

Robert V. Whitman, Chairman; John A. Focht, Jr.; Harold J. Gibbs;
James P. Gould; Kenneth S. Lane; Frank E. Richart, Jr.;
Woodland G. Shockley; Thomas H. Thornburn
H. Bolton Seed, Executive Committee Contact Member

CONTENTS

PIERO SEMBENELLI
MILANO

December, 1962

Papers

	Page
Ground Displacements from Air-Blast Loading by Stanley D. Wilson and Earl A. Sibley	1
Inelastic Wave Propagation in Soil Columns by Werner Heierli	33
Determining the Capacity of Bent Piles by Sidney M. Johnson	65
(over)	

Copyright 1962 by the American Society of Civil Engineers.

Note.—Part 2 of this Journal is the 1962-44 Newsletter of the Soil Mechanics Division.

The three preceding issues of this Journal are dated June 1962, August 1962, and October 1962.

	Soil Stabilization with Cement and Sodium Additives by Za-Chieh Moh.	81
M di re to ing	Soil-Cement as Slope Protection for Earth Dams by W. G. Holtz and F. C. Walker.	107
	Basic Experiment into Soil-Structure Interaction by Robert V. Whitman and Ulrich Luscher	135
	Comparisons of One and Two-Specimen CFS Tests by John H. Schmertmann.	169
wc	Analysis of Primary and Secondary Consolidation by Harvey E. Wahls	207

DISCUSSION

of pro app Ap	Simplified Design of Combined Footings, by Fritz Kramrisch and Paul Rogers. (October, 1961. Prior discussion: March, June, 1962. Discussion closed.) by Fritz Kramrisch and Paul Rogers (closure)	235
cop exp	Influence of Geological Conditions on Uplift, by W. Harold Stuart. (December, 1961. Prior discussion: August, 1962. Discussion closed.) by W. Harold Stuart (closure).	237
pap and Pho mus	Static and Dynamic Behavior of Small Footings, by E. T. Selig and K. E. McKee. (December, 1961. Prior discussion: June, August, 1962. Discussion closed.) by E. T. Selig and K. E. McKee (closure).	239
abs text	Effect of Local Loss of Support on Foundation Design, by F. E. Richart, Jr., and P. Zia. (February, 1962. Prior discussion: June, 1962. Discussion closed.) by F. E. Richart, Jr., and P. Zia (closure).	243
pers and	Cement Grouting, Progress Report of the Task Committee on Cement Grouting of the Committee on Grouting of the Soil Mechanics and Foundations Division. (April, 1962. Prior discussion: October, 1962. Discussion closed.) by S. Champion by Thomas F. Thompson.	245 245
of a Soci expr	Behavior of Pipes Buried in Expansive Clays, by Gabriel Kassiff and Joseph Zeitlen. (April, 1962. Prior discussion: October, 1962. Discussion closed.) by John E. Holland.	255

Compacting a Dam Foundation by Blasting, by Charles E. Hall. (June, 1962. Prior discussion: October, 1962. Discussion closed.)	
by Dinesh Mohan	259
by W. J. Turnbull.	260
Prediction of Swelling Potential for Compacted Clays, by H. Bolton Seed, R. J. Woodward, and R. Lundgren. (June, 1962. Prior discussion: August, 1962. Discussion closed.)	
by Michael Praszker	263
by E. Zolkov	266
by M. C. Li.	267
by W. D. Liam Finn	268
Load-Carrying Capacity of Concrete Pavements, by G. G. Meyerhof. (June, 1962. Prior discussion: None. Discussion closed.)	
by Paul F. Carlton and Ruth M. Behrmann	271
by A. C. Liebenberg.	278
by Frank Penner	280
Bulkhead Test Program at Port of Toledo, Ohio, by Peter A. Hakman and Warren M. Buser. (June, 1962. Prior discussion: None. Discussion closed.)	
by A. L. Bentley, Jr.	287
by P. W. Rowe.	288
An Approach to Rock Mechanics, by Klaus W. John. (August, 1962. Prior discussion: None. Discussion closes January 1, 1963.)	
by Lawrence Adler.	291
Analysis of the Engineering News Pile Formula, by Hans A. Agerschou. (October, 1962. Prior discussion: None. Discussion closes March 1, 1963.)	
by James M. Abernathy.	295
