PROCEEDINGS OF THE

AMERICAN SOCIETY

OF CIVIL ENGINEERS

BITCOLD

R

ASCE

1965

1

2-R-11

## BASIC REQUIREMENTS FOR MANUSCRIPTS

Original papers and discussions of current papers should be submitted to the Manager of Technical Publications, ASCE. Authors must indicate the Technical division, technical committee, sub-committee, and task committee (if any) to which the paper should be referred. The final date on which a discussion should reach the Society is given as a footnote with each paper. Those who are planning to submit material will expedite the review and publication procedures by complying with the following basic requirements:

1. Titles must have a length not exceeding 50 characters and spaces.
2. A summary of approximately 50 words must accompany the paper, a 300-word synopsis must precede it, and a set of conclusions must end it.
3. The manuscript (an original ribbon copy and two duplicate copies) should be double-spaced on one side of 8½-inch by 11-inch paper. Three copies of all illustrations, tables, etc., must be included.
4. The author's full name, Society membership grade, and footnote reference stating present employment must appear on the first page of the paper.
5. Mathematics are recomposed from the copy that is submitted. Because of this, it is necessary that letters be drawn carefully, and that special symbols be properly identified. The letter symbols used should be defined where they first appear, in the illustrations or in the text, and arranged alphabetically in an Appendix.
6. Tables should be typed (an original ribbon copy and two duplicate copies) on one side of 8½-inch by 11-inch paper. Specific illustrations and explanation must be made in the text for each table.
7. Illustrations must be drawn in black ink on one side of 8½-inch by 11-inch paper. Because illustrations will be reproduced with a width of between 3-inches and 4½-inches, the lettering must be large enough to be legible at this width. Photographs should be submitted as glossy prints. Explanations and descriptions must be made within the text for each illustration.
8. The desirable average length of a paper is about 10,000 word-equivalents and the absolute maximum is 15,000 word-equivalents. As an approximation, each full manuscript page of text, table, or illustration is the equivalent of 300 words.
9. Technical papers intended for publication must be written in the third person.
10. A list of key words and an informative abstract should be provided for information retrieval purposes.

Reprints from this Journal may be made on condition that the full title, name of author, name of publication, page reference, and date of publication by the Society are given. The Society is not responsible for any statement made or opinion expressed in its publications.

This Journal is published bi-monthly by the American Society of Civil Engineers. Publication office is at 2500 South State Street, Ann Arbor, Michigan. Editorial and General Offices are at United Engineering Center, 345 East 47th Street, New York 17, N.Y. \$4.00 of a member's dues are applied as a subscription to this Journal. Second-class postage paid at Ann Arbor, Michigan.

The index for 1963 was published as ASCE Publication 1964-15 (list price \$2.00); indexes for previous years are also available.

DISCUSSION

---

Foundation Modulus Tests for Karadj Arch Dam, by W. A. Waldorf, J. A. Veltrop, and J. J. Curtis. (July, 1963. Prior discussion: January, March, 1964. Discussion closed.) by W. A. Waldorf, J. A. Veltrop, and J. J. Curtis (closure) . . . . .	169
Stability of Cuts in Soft Clays, by T. Cameron Kenney. (September, 1963. Prior discussion: March, May, July, 1964. Discussion closed.) by T. Cameron Kenney (closure) . . . . .	180
Shear Strength of Anisotropically Consolidated Clay, by Bengt B. Broms, and M. V. Ratnam. (November, 1963. Prior discussion: July, 1964. Discussion closed.) by Bengt B. Broms and M. V. Ratnam (closure) . . . . .	182
Lateral Resistance of Piles in Cohesive Soils, by Bengt B. Broms. (March, 1964. Prior discussion: November, 1964. Discussion closed.) by Hudson Matlock and Berry R. Grubbs. . . . .	183
Rebound in Design of Oahe Hydraulic Structure, by Lloyd B. Underwood, Stanley T. Thorfinnson, and William T. Black. (March, 1964. Prior discussion: None. Discussion closed.) errata . . . . .	188
Analysis of Pile Groups with Flexural Resistance, by Arthur J. Francis. (May, 1964. Prior discussion: November, 1964. Discussion closed.) by Peter Kocsis . . . . .	188
Electric Analogs in Time-Settlement Problems, by Patrick Domenico and Glen Clark. (May, 1964. Prior discussion: November, 1964. Discussion closed.) by Ulrich Luscher . . . . .	190
Foundation Behavior of Iron Ore Storage Yards, by Ralph B. Peck and Tonis Raamot. (May, 1964. Prior discussion: November, 1964. Discussion closed.) by William S. Housel. . . . .	196

Lateral Resistance of Piles in Cohesionless Soils, by Bengt B. Broms. (May, 1964. Prior discussion: None. Discussion closed.)	
by Shamsher Prakash and S. L. Agarwal. . . . .	210
Pore Pressures and Bearing Capacity of Layered Clays, by T. Cameron Kenney. (July, 1964. Prior discussion: None. Discussion closed.)	
by A. A. Fungaroli . . . . .	212
Clay Mineralogical Aspects of the Atterberg Limits, by H. Bolton Seed, Richard J. Woodward, Jr., and Raymond Lundgren. (July, 1964. Prior discussion: None. Discussion closed.)	
by J. MacNeill Turnbull. . . . .	218
by Melvin I. Esrig . . . . .	220
Stress-Strain Modulus of Clay in Undrained Shear, by Charles C. Ladd. (September, 1964. Prior discussion: None. Discussion closes February 1, 1965.)	
by Hiram G. Larew. . . . .	224
Settlement Response Caused by Footing Groups, by Raymond J. Krizek and Robert L. Kondner. (September, 1964. Prior discussion: None. Discussion closes February 1, 1965.)	
by E. S. Barber . . . . .	228
Interpretation of the Consolidation Test, by Carl B. Crawford. (September, 1964. Prior discussion: None. Discussion closes February 1, 1965.)	
by Nyal E. Wilson and M. B. Lo . . . . .	231
