CODEN: JGENDZ

Journal of
**Geotechnical
Engineering**

AMERICAN SOCIETY OF CIVIL ENGINEERS

GEOTECHNICAL ENGINEERING DIVISION

General Information

Journal of Geotechnical Engineering covers the field of soil mechanics and foundations, with special emphasis on the relationship between the geologic environment and man-made works. Computer applications are also examined. Topics include dynamic response of foundations, earth-retaining structures, earth-retained structures, and dam construction and slope stability, as well as soil tests and their solutions.

Journal of Geotechnical Engineering (ISSN 0733-9410) is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, NY 10017-2398. All editorial correspondence should be directed to the Journals Department. Second-class postage is paid at New York, NY, and at additional mailing offices.

Postmaster: Send address changes to *Journal of Geotechnical Engineering*, ASCE, 345 East 47th Street, New York, NY 10017-2398.

Submission of papers. Submit five copies of papers and notes and three copies of discussions to the Journals Department. Maximum length for papers is 10,000 words; for notes, 2,500 words; for discussions, 1,250 words. Multiple submissions are not accepted for review. Indicate division and, if applicable, committee to which material is being submitted. The use of SI units is preferred; if other units are used, SI equivalents must also be given. Write or phone the Journals Department for *ASCE Authors' Guide to Journals, Books, and Reference Publications* for complete instructions for manuscript preparation.

Reprints for authors are ordered prior to publication; others may order them by using the coupon published in *ASCE News* and *ASCE Publications Information* or contacting the Reprint Department, ASCE.

Photocopies. Authorization to photocopy internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by ASCE to libraries and other users registered with the Copyright Clearance Center, (CCC) Transactional Reporting Service, provided that the base fee of \$1.00 per article plus \$.15 per page is paid directly to CCC, 27 Congress Street, Salem, MA 01970. The identification for *Journal of Geotechnical Engineering* is 0733-9410/90 \$1.00 + \$.15. Requests for special permission or bulk copying should be addressed to the Journals Reprint Department, ASCE.

Subscriptions. 1990 rates are \$36.00 for members and \$144.00 for nonmembers. Postage outside the U.S.A. is \$16.00 additional. Single copies are \$15.00. Address all *member* subscription inquiries and correspondence to Member Records, ASCE. Address all *nonmember* inquiries and correspondence to Publications Fulfillment Department, ASCE. Subscriptions are filled for the calendar year and must be prepaid. Notify the appropriate ASCE department of an address change as soon as possible; allow six weeks for it to become effective.

This publication is abstracted in *ASCE Publications Information* (bi-monthly), *Transactions of the ASCE* (annually), and Civil Engineering Database (on-line), and indexed in *ASCE Annual Combined Index*. Address inquiries to Information Products, ASCE.

The Society is not responsible for any statement made or opinion expressed in its publications.

Journal of Geotechnical Engineering

Volume 116 Number 4 April 1990

TECHNICAL PAPERS

- Hydraulic Characteristics of Municipal Refuse.
**Issa S. Oweis, Donald A. Smith, R. Brian Ellwood,
and Daniel S. Greene** 539
- Random Field Modeling of Foundation Failure Modes.
Knut O. Ronold 554
- Pile Behavior Established from Model Tests.
Robert E. Abendroth and Lowell F. Greimann 571
- Influence of Structure and Composition on Residual Soils.
Laurence D. Wesley 589
- Stiffness Coefficients of Layered Soil Systems.
A. Sridharan, N. S. V. V. S. J. Gandhi, and S. Suresh 604
- Rock Mass Characterization for Dam Foundations.
Brian A. Chappell 625
- Kettleman Hills Waste Landfill Slope Failure. I: Liner-System
Properties.
James K. Mitchell, Raymond B. Seed, and H. Bolton Seed 647
- Kettleman Hills Waste Landfill Slope Failure. II: Stability
Analyses.
Raymond B. Seed, James K. Mitchell, and H. Bolton Seed 669

TECHNICAL NOTES

- Analysis of Pile Groups with Variable Shaft-Load over Point-
Load Ratios.
José L. M. Clemente 692
- Particle Gradation and Liquefaction.
Y. P. Vaid, J. M. Fisher, R. H. Kuerbis, and D. Negussey 698

Overturing Instability.
Edmund C. Hambly704

DISCUSSIONS

Effective Stress Dependence of Pile Shaft Capacity in
Calcareous Sand. C. Y. Lee and H. G. Poulos.
By José L. M. Clemente. Closure by authors712

Improvements in Grouting of Large Ground Anchors. A. C.
Houlsby.
By John C. King and Edward D. Graf.
By Morris Schupack. Closure by author713

Centrifuge Evaluation of Numerical Model for Clay. Robert
Y. K. Liang and James K. Mitchell.
By M. C. R. Davies, M. S. S. Almeida, and M. J. Gunn.
Closure by authors721
