PROCEEDINGS OF THE

AMERICAN SOCIETY

OF CIVIL ENGINEERS

BASIC REQUIREMENTS FOR MANUSCRIPTS

Original papers and discussions of current papers should be submitted to the Manager of Technical Publications, ASCE. Authors must indicate the technical division, technical committee, sub-committee, and task committee (if any) to which the paper should be referred. The final date on which a discussion should reach the Society is given as a footnote with each paper. Those who are planning to submit material will expedite the review and publication procedures by complying with the following basic requirements:

1. Titles must have a length not exceeding 50 characters and spaces.
2. A summary of approximately 50 words must accompany the paper, and a set of conclusions must end it.
3. The manuscript (an original ribbon copy and two duplicate copies) should be double-spaced on one side of 8½-inch by 11-inch paper. Three copies of all illustrations, tables, etc., must be included.
4. The author's full name, Society membership grade, and footnote reference stating present employment must appear on the first page of the paper. (Authors need not be Society members).
5. Mathematics are recomposed from the copy that is submitted. Because of this, it is necessary that letters be drawn carefully, and that special symbols be properly identified. The letter symbols used should be defined where they first appear, in the illustrations or in the text, and arranged alphabetically in an Appendix.
6. Tables should be typed (an original ribbon copy and two duplicate copies) on one side of 8½-inch by 11-inch paper. Specific illustrations and explanation must be made in the text for each table.
7. Illustrations must be drawn in black ink on one side of 8½-inch by 11-inch paper. Because illustrations will be reproduced with a width of between 3-inches and 4½-inches, the lettering must be large enough to be legible at this width. Photographs should be submitted as glossy prints. Explanations and descriptions must be made within the text for each illustration.
8. The desirable average length of a paper is about 10,000 word-equivalents and the absolute maximum is 15,000 word-equivalents. As an approximation, each full manuscript page of text, table, or illustration is the equivalent of 300 words.
9. Technical papers must be written in the third person.
10. A list of key words and an informative abstract should be provided for information retrieval purposes. (Information on preparation available on request.).

Reprints from this Journal may be made on condition that the full title, name of author, name of publication, page reference, and date of publication by the Society are given. The Society is not responsible for any statement made or opinion expressed in its publications.

This Journal is published bi-monthly by the American Society of Civil Engineers. Publication office is at 2500 South State Street, Ann Arbor, Michigan. Editorial and General Offices are at United Engineering Center, 345 East 47th Street, New York 17, N. Y. \$4.00 of a member's dues are applied as a subscription to this Journal. Second-class postage paid at Ann Arbor, Michigan.

The index for 1964 was published as ASCE Publication 1965-1 (list price \$2.00); indexes for previous years are also available.

Note.—Part 2 of this Journal is the 1965-52 Journal of the Soil Mechanics Division.

The three preceding issues of this Journal are dated May, 1965, July, 1965, and September, 1965.

 DISCUSSION

Yielding and Locking of Confined Sand, by Robert V. Whitman, Edmond T. Miller, and Peter J. Moore. (July, 1964. Prior discussion: March, 1965. Discussion closed.) by Robert V. Whitman, Edmond T. Miller and Peter J. Moore (closure)	97
Engineering Measurements for Port Allen Lock, by Robert I. Kaufman and Walter C. Sherman, Jr. (September, 1964. Prior discussion: May, 1965. Discussion closed.) by Robert I. Kaufman and Walter C. Sherman, Jr. (closure)	98
Differential Settlement at Selfridge Air Force Base, by George B. Wallace and William C. Otto. (September, 1964. Prior discussion: May, 1965. Discussion closed.) by George B. Wallace and William C. Otto (closure)	99
Interpretation of the Consolidation Test, by Carl B. Crawford. (September, 1964. Prior discussion: January, March, May, 1965. Discussion closed.) by Carl B. Crawford (closure)	104
Earthquake Stability of Slopes of Cohesionless Soils, by H. Bolton Seed and Richard E. Goodman. (November, 1965. Prior discussion: May, July, 1965. Discussion closed.) errata	108
Fundamental Aspects of the Atterberg Limits, by H. Bolton Seed, Richard J. Woodward, and Raymond Lundgren. (November, 1964. Prior discussion: July, 1965. Discussion closed.) by Jaroslav Feda	109
Self-Recording Soil Penetrometer, by Bengt B. Broms and D. E. Broussard. (January, 1965. Prior discussion: May, 1965. Discussion closed.) by Bengt B. Broms and D. E. Broussard (closure)	114
Measuring Instruments for Struttred Excavations, by Lauritis Bjerrum, T. Cameron Kenney, and Bjørn Kjaernsli. (January, 1965. Prior discussion: September, 1965. Discussion closed.) by W. H. Ward	114
Precompression for Support of Shallow Foundations, by Harl P. Aldrich. (March, 1965. Prior discussion: July, 1965. Discussion closed.) by N. E. Simons	115

Shallow Foundations, by George G. Meyerhof. (March 1965. Prior discussion: None. Discussion closed.)	
by Clyde N. Baker, Jr.	119
Pile and Pier Foundations, by Ralph B. Peck. (March, 1965. Prior discussion: September, 1965. Discussion closed.)	
by R. F. Bartholomew and N. E. Simons	122
In-Situ Strength Characteristics of Soft Clays, by Iraj Noorany and H. Bolton Seed. (March, 1965. Prior discussion: None. Discussion closed.)	
by John H. Schmertmann	123
Settlement Analyses, A Review of Theory and Testing Procedures, by H. Bolton Seed. (March, 1965. Prior discussion: None. Discussion closed.)	
by Carl B. Crawford	127
State-of-the-Art of Floating Foundations, by Hugh Q. Golder. (March, 1965. Prior discussion: September, 1965. Discussion closed.)	
by Pablo Girault	128
Some Swelling Characteristics of Compacted Clay, by James V. Parcher and Ping-Chuan Liu. (May, 1965. Prior discussion: None. Discussion closed.)	
by O. Clarke Mann	130
Tolerance of Structures to Settlement, by Jacob Feld. (May, 1965. Prior discussion: September, 1965. Discussion closed.)	
by Saki Rosenhaupt	131
Stability of Slopes in Anisotropic Soils, by Kwan Yee Lo. (July, 1965. Prior discussion: None. Discussion closes December 1, 1965.)	
by George G. Meyerhof	132
