Journal of
**Geotechnical
Engineering**

AMERICAN SOCIETY OF CIVIL ENGINEERS

GEOTECHNICAL ENGINEERING DIVISION

General Information

Journal of Geotechnical Engineering covers the broad area of practice known as geotechnical engineering. Papers are welcomed on traditional topics such as foundations, earth-supported structures, soil dynamics, consolidation, engineering behavior of soil and rock, slope stability, dams, and rock engineering. Authors are encouraged to submit papers on newer topics such as environmental geotechnics, geosynthetics, computer modeling, ground-water monitoring and restoration, and coastal and geotechnical ocean engineering. Theoretical papers dealing with geomechanics are welcome, but only if there is a clear and significant potential for practical application, in the present or future, for the theory. Practice-oriented papers and case histories are particularly welcomed and encouraged.

Journal of Geotechnical Engineering (ISSN 0733-9410) is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, NY 10017-2398. All editorial correspondence should be directed to the Journals Department. Second-class postage is paid at New York, NY, and at additional mailing offices.

Postmaster: Send address changes to *Journal of Geotechnical Engineering*, ASCE, 345 East 47th Street, New York, NY 10017-2398.

Submission of papers. Submit five copies of papers and notes and three copies of discussions to the Journals Department. Maximum length for papers is 10,000 words; for notes, 3,500 words; for discussions, 1,250 words. Multiple submissions are not accepted for review. Indicate division and, if applicable, committee to which material is being submitted. The primary use of SI units is mandatory. When SI units are used, no other units are required. Units other than SI may also be given in parentheses or in an appendix. Write or phone the Journals Department for *ASCE Authors' Guide to Journals, Books, and Reference Publications* for complete instructions for manuscript preparation.

Reprints for authors can be ordered prior to publication using reprint order forms provided by the Editorial Department.

Photocopies. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by ASCE to libraries and other users registered with the Copyright Clearance Center, (CCC) Transactional Reporting Service, provided that the base fee of \$2.00 per article plus \$.25 per page copied is paid directly to CCC, 27 Congress Street, Salem, MA 01970. The identification for *Journal of Geotechnical Engineering* is 0733-9410/94 \$2.00 + \$.25. Requests for special permission or bulk copying should be addressed to the Permissions and Copyright Department, ASCE.

Subscriptions. 1994 rates are \$53.00 for members and \$212.00 for nonmembers. Postage outside the U.S.A. is \$28.00 additional. Single copies are \$24.00. Address all *member* subscription inquiries and correspondence to Member Records, ASCE. Address all *nonmember* inquiries and correspondence to Publications Fulfillment Department, ASCE. Subscriptions are filled for the calendar year and must be prepaid. Notify the appropriate ASCE department of an address change as soon as possible; allow six weeks for it to become effective.

This publication is abstracted in *ASCE Publications Information* (bi-monthly), *Transactions of the ASCE* (annually), and Civil Engineering Database (on-line), and indexed in *ASCE Annual Combined Index*. Address inquiries to Information Products, ASCE.

The Society is not responsible for any statement made or opinion expressed in its publications.

Journal of Geotechnical Engineering

Volume 120 Number 3 March 1994

TECHNICAL PAPERS

- Evaluation of Consolidation Behavior of Mine Tailings.
K. J. L. Stone, M. F. Randolph, S. Toh, and A. A. Sales 473
- Nonlinear Lateral, Rocking, and Torsional Vibration of Rigid Foundations.
Ronaldo I. Borja, Wen-Hwa Wu, Alexander P. Amies, and H. Allison Smith 491
- Damage Mechanisms and Influence of Gradation for Steep Riprap.
Karol Rohan, Mahrez Ben Belfadhel, Guy Lefebvre, and Oscar Dascal 514
- Identification and Characterization of Collapsible Gravels.
Kyle M. Rollins, Ralph L. Rollins, Trevor D. Smith, and George H. Beckwith 528
- Earthquake Fault Rupture Propagation through Soil.
Jonathan D. Bray, Raymond B. Seed, Lloyd S. Cluff, and H. Bolton Seed 543
- Analysis of Earthquake Fault Rupture Propagation through Cohesive Soil.
Jonathan D. Bray, Raymond B. Seed, and H. Bolton Seed 562
- Liquefaction and Embankment Failure Case Histories, 1988 Armenia Earthquake.
M. K. Yegian, V. G. Ghahraman, and R. N. Harutiunyan 581
- Landfill Liner Interface Strengths from Torsional-Ring-Shear Tests.
Timothy D. Stark and Alan R. Poeppel 597

TECHNICAL NOTE

Swell-Shrink Behavior of Compacted Clay.

Robert W. Day..... 618
