

PIERO SEMBENELLI
MILANO

VOLUME 89 NO. SM4
JULY 1963
PART 1

JOURNAL of the
Soil Mechanics
and Foundations
Division

PROCEEDINGS OF THE

**AMERICAN SOCIETY
OF CIVIL ENGINEERS**

BASIC REQUIREMENTS FOR MANUSCRIPTS

Original papers and discussions of current papers should be submitted to the Manager of Technical Publications, ASCE. Authors should indicate the technical division to which the paper is referred. The final date on which a discussion should reach the Society is given as a footnote with each paper. Those who are planning to submit material will expedite the review and publication procedures by complying with the following basic requirements:

1. Titles must have a length not exceeding 50 characters and spaces.
2. A summary of approximately 50 words must accompany the paper, a 300-word synopsis must precede it, and a set of conclusions must end it.
3. The manuscript (an original ribbon copy and two duplicate copies) should be double-spaced on one side of 8½-inch by 11-inch paper. Three copies of all illustrations, tables, etc., must be included.
4. The author's full name, Society membership grade, and footnote reference stating present employment must appear on the first page of the paper.
5. Mathematics are recomposed from the copy that is submitted. Because of this, it is necessary that letters be drawn carefully, and that special symbols be properly identified. The letter symbols used should be defined where they first appear, in the illustrations or in the text, and arranged alphabetically in an Appendix.
6. Tables should be typed (an original ribbon copy and two duplicate copies) on one side of 8½-inch by 11-inch paper. Specific illustrations and explanation must be made in the text for each table.
7. Illustrations must be drawn in black ink on one side of 8½-inch by 11-inch paper. Because illustrations will be reproduced with a width of between 3-inches and 4½-inches, the lettering must be large enough to be legible at this width. Photographs should be submitted as glossy prints. Explanations and descriptions must be made within the text for each illustration.
8. The desirable average length of a paper is about 12,000 words and the absolute maximum is 18,000 words. As an approximation, each full page of typed text, table, or illustration is the equivalent of 300 words.
9. Technical papers intended for publication must be written in the third person.
10. A list of key words and an informative abstract should be provided for information retrieval purposes.

Reprints from this Journal may be made on condition that the full title, name of author, name of publication, page reference, and date of publication by the Society are given. The Society is not responsible for any statement made or opinion expressed in its publications.

This Journal is published bi-monthly by the American Society of Civil Engineers. Publication office is at 2500 South State Street, Ann Arbor, Michigan. Editorial and General Offices are at United Engineering Center, 345 East 47th Street, New York 17, N.Y. \$4.00 of a member's dues are applied as a subscription to this Journal. Second-class postage paid at Ann Arbor, Michigan.

The index for 1961 was published as ASCE Publication 1962-10 (list price \$2.00); indexes for previous years are also available.

Journal of the
SOIL MECHANICS AND FOUNDATIONS DIVISION
 Proceedings of the American Society of Civil Engineers

**SOIL MECHANICS AND FOUNDATIONS DIVISION
 EXECUTIVE COMMITTEE**

John Lowe, III, Chairman; Wesley G. Holtz, Vice Chairman;
 Reginald A. Barron; Bramlette McClelland; H. Bolton Seed, Secretary;
 Leland J. Walker, Board Contact Member

COMMITTEE ON PUBLICATIONS

Robert V. Whitman, Chairman; John A. Focht, Jr.; Harold J. Gibbs;
 James P. Gould; Kenneth S. Lane; L. C. Reese; Frank E. Richart, Jr.;
 Woodland G. Shockley; R. J. Woodward;
 H. Bolton Seed, Executive Committee Contact Member

Papers

	Page
Compression of Partially Saturated Cohesive Soils by Y. Yoshimi and J. O. Osterberg	1
Seepage Under Dams by Hammad Y. Hammad	25
<u>Bibliography on Cement Grouting</u> Progress Report of the Committee on Grouting of the Soil Mechanics and Foundations Division (over)	45

Copyright 1963 by the American Society of Civil Engineers.

Note.—Part 2 of this Journal is the 1963-28 Newsletter of the Soil Mechanics Division.

The three preceding issues of this Journal are dated February 1963, March 1963, and May 1963.

Study of Failure Envelope of Soils, by T. H. Wu, A. K. Loh, and L. E. Malvern. (February, 1963. Prior discussion: None. Discussion closed.)	
by A. O. Peter Casbarian and Abdul K. Jamal	243
by K. Y. Lo	243
Effective Stress Theory of Soil Compaction, by Roy E. Olson. (March, 1963. Prior discussion: None. Discussion closes August, 1963.)	
by Bengt B. Broms	247

INFORMATION RETRIEVAL

The key words, abstract and reference "cards" for each article in this Journal represent part of the ASCE participation in the EJC information retrieval plan. The retrieval data are placed herein so that each can be cut out, placed on a 3 x 5 card and given an accession number for the user's file. The accession number is then entered on key word cards so that the user can subsequently match key words to choose the articles he wishes. Details of this program were given in an August 1962 article in CIVIL ENGINEERING, reprints of which are available on request to ASCE headquarters.
