BUREAU OF RECLAMATION

DESIGN OF SMALL DAMS

A Water Resources Technical Publication

Second Edition

1973

Revised Reprint

1977

Contents

Preface to the second edition	v
Preface to the first edition	vii

Chapter I—Project Planning

A. PURPOSE OF THE DEVELOPMENT

<i>Section</i>	
1. General	1
2. Irrigation	1
3. Domestic and municipal purposes	2
4. Industrial use	2
5. Stock water	2
6. Power development	2
7. Flood control	2
8. Recreation	2
9. Wildlife	3
10. Water storage for streamflow regulation	3
11. Miscellaneous water conservation projects	3

B. PROJECT STUDIES

12. Tests of feasibility	4
13. Esthetic values	4
14. Extent of studies	4
15. Stages of investigation	4
16. Related projects and studies of need	5
17. Development of the general plan	5
18. Outline of investigations	8
19. Planning programs for surveys and investigations	10
20. Mapping	11
21. Hydrologic investigations	12
22. Investigations of foundations and materials	14
23. Sanitary studies	15
24. Recreation and fish and wildlife	15
25. Design of structures	15
26. Preparation of cost estimates	15
27. Quantity estimates	15

Chapter I—Project Planning—Con.

B. PROJECT STUDIES—Continued

<i>Section</i>	<i>Page</i>
28. Unit costs	16
29. Finalizing the project plans	16
30. Planning reports	17
31. Report on design of dam	17

C. BIBLIOGRAPHY

32. Bibliography	19
----------------------------	----

Chapter II—Ecological and Environmental Considerations

A. INTRODUCTION

33. The basis for environmental and ecological considerations	21
(a) General considerations	21
(b) Planning operations	22

B. FISH AND WILDLIFE CONSIDERATIONS

34. Fish and wildlife considerations	22
(a) General	22
(b) Ecological and environmental considerations for fish	22
(c) Environmental considerations for wildlife	26

C. RECREATIONAL CONSIDERATIONS

35. Recreational considerations	29
(a) General	29
(b) Recreational development	29

D. DESIGN CONSIDERATIONS

36. Environmental design considerations	31
(a) General	31

Chapter II—Ecological and Environmental Considerations—Con.

D. DESIGN CONSIDERATIONS—Continued

Section	Page
(b) Structural considerations	31
(c) Landscape considerations	32
(d) Protective considerations	33
(e) Construction considerations	33

E. BIBLIOGRAPHY

37. Bibliography	35
----------------------------	----

Chapter III—Flood Studies

A. GENERAL

38. Scope	37
39. Streamflow data	37
40. Precipitation data	39
41. Use of streamflow and precipitation records	39
42. Watershed data	40
43. Factors to be considered in estimating flood flows	40
(a) General	40
(b) Geographical location	41
(c) Storm potential	41
(d) Drainage area	42
(e) Soil and cover	42
(f) Runoff distribution	42
44. A method of computing maximum probable flood discharge	42
45. Inflow design flood	43
46. Envelope curves	44
47. Estimates of frequency of occurrence of floods	44
48. Special cases	45

B. PROCEDURES

49. Introduction	46
50. Estimating storm potential	46
(a) General	46
(b) Definitions	46
(c) Probable maximum storm considerations	47
) Generalized precipitation charts	47

Chapter III—Flood Studies—Continued

B. PROCEDURES—Continued

Section	Page
(e) Design storms for low hazard areas	52
51. Estimating runoff from rainfall	54
(a) General	54
(b) Analysis of observed rainfall data	57
(c) Estimating direct runoff from soil and cover data	61
52. Unitgraph principles	64
53. Hydrograph analysis	64
54. Unitgraph derivation for ungaged areas	65
55. Triangular hydrograph analysis	67
56. Estimating time of concentration	67
57. Application of triangular hydrographs	67
58. A method of computing an inflow design flood	73
(a) Watershed data	73
(b) Magnitude criteria	73
(c) Computation of inflow design floods—east of 105° meridian	76
(d) Computation of inflow design floods—west of 105° meridian	84
59. Frequency curve computations	92

C. BIBLIOGRAPHY

60. Bibliography	93
----------------------------	----

Chapter IV—Selection of Type of Dam

A. CLASSIFICATION OF TYPES

61. General	97
62. Classification according to use	97
63. Classification by hydraulic design	97
64. Classification by materials	98
65. Earthfill	98
66. Rockfill	100
67. Concrete gravity	100
68. Concrete arch	101
69. Concrete buttress	101
70. Other types	102

Chapter IV—Selection of Type of Dam—Continued

B. PHYSICAL FACTORS GOVERNING SELECTION OF TYPE

Section	Page
71. General	102
72. Topography	102
73. Geology and foundation conditions	102
74. Materials available	103
75. Spillway size and location	103
76. Earthquake	104

C. LEGAL, ECONOMIC, AND ESTHETIC CONSIDERATIONS

77. Statutory restrictions	104
78. Purpose and benefit-cost relation	104
79. Appearance	105

Chapter V—Foundations and Construction Materials

A. SCOPE OF INVESTIGATIONS

80. General	107
81. Foundations	107
82. Embankment soils	110
83. Riprap and rockfill	112
84. Concrete aggregate	113

B. SOURCES OF INFORMATION

85. Topographic maps	114
86. Geologic maps	115
87. Agricultural soil maps	118
88. Airphotos	124

C. SOIL CLASSIFICATION

89. General	127
90. Soil components	128
(a) Size	128
(b) Gradation	128
(c) Shape	130
91. Soil moisture	131
92. Properties of soil components	132
(a) Gravel and sand	132
(b) Silt and clay	132
(c) Organic matter	135

Chapter V—Foundations and Construction Materials—Continued

C. SOIL CLASSIFICATION—Continued

Section	Page
93. Unified Soil Classification System	135
(a) General	135
(b) Field classification	135
(c) Laboratory classification	136
94. Engineering characteristics of soil groups	136
(a) General	136
(b) Permeability	137
(c) Compressibility	138
(d) Shear strength	139

D. ROCK CLASSIFICATION

95. Rocks and minerals	139
(a) Definition and types	139
(b) Mineral identification	139
(c) Common rock-forming minerals	140
96. Igneous rocks	141
(a) General	141
(b) Classification of igneous rocks	142
(c) Primary structural features of igneous rocks	144
97. Sedimentary rocks	144
(a) General	144
(b) Classification of sedimentary rocks	146
(c) Primary structural features of sedimentary rocks	147
98. Metamorphic rocks	148
(a) General	148
(b) Classification of common metamorphic rocks	148
99. Engineering properties of rocks	149

E. SURFACE EXPLORATIONS

100. General	150
101. Fluvial soils	150
(a) Definition	150
(b) Torrential outwash	151
(c) Valley fill	151
(d) Lake beds	156

Chapter V—Foundations and Construction Materials—Continued

E. SURFACE EXPLORATIONS—Continued

Section	Page
102. Glacial deposits	156
(a) Definition	156
(b) Morainal deposits	156
(c) Glacial outwash	156
103. Aeolian deposits	157
104. Residual soils	158

F. SUBSURFACE EXPLORATORY METHODS

105. Test pits, trenches, and tunnels	158
(a) General	158
(b) Test pits	158
(c) Trenches	159
(d) Tunnels	160
106. Auger borings	160
107. Rotary drilling	163
108. Standard penetration borings	167
109. Geophysical methods	168

G. SAMPLING

110. General	169
111. Disturbed samples	171
(a) Sampling open excavations	171
(b) Sampling auger holes	172
(c) Sampling stockpiles	172
(d) Riprap samples	173
(e) Concrete aggregate samples	173
112. Relatively undisturbed samples	173
(a) Penetration samples	173
(b) Hand-cut samples	175
(c) Rock cores	179

H. LOGGING OF EXPLORATIONS

113. Identification of holes	185
114. Log forms	186
115. Description of soils	189
116. Description of rock cores	191

I. FIELD AND LABORATORY TESTS

117. General	193
------------------------	-----

Chapter V—Foundations and Construction Materials—Continued

I. FIELD AND LABORATORY TESTS—Continued

Section	Page
118. Field permeability tests	193
(a) General	193
(b) Open-end tests	193
(c) Packer tests	195
119. Density-in-place tests	196
(a) Sand density method	196
(b) Method for dry, gravel-free soils	199
120. Laboratory tests on soils	199
(a) Gradation	199
(b) Water content	200
(c) Atterberg limits	200
(d) Specific gravity	200
(e) Proctor compaction	201
(f) Relative density	201
121. Laboratory tests on riprap and concrete aggregate	203
(a) Specific gravity and absorption	203
(b) Abrasion	203
(c) Soundness	203

J. BIBLIOGRAPHY

122. Bibliography	204
-----------------------------	-----

Chapter VI—Earthfill Dams

A. INTRODUCTION

123. Origin and development	205
124. Scope of discussion	205
125. Selection of type of earthfill dam	207
(a) General	207
(b) Diaphragm type	207
(c) Homogeneous type	208
(d) Zoned embankment type	209

B. DESIGN PRINCIPLES

126. Design data	210
127. Criteria for design	210

C. FOUNDATION DESIGN

128. General	211
------------------------	-----

Chapter VI—Earthfill Dams—Continued

C. FOUNDATION DESIGN—Continued

Section	Page
129. Rock foundations	212
130. Characteristics of sand and gravel foundations	219
(a) General	219
(b) Amount of underseepage	220
(c) Seepage forces	221
131. Methods of treatment of sand and gravel foundations	222
(a) General	222
(b) Cutoff trenches	223
(c) Partial cutoff trenches	225
(d) Sheet piling cutoffs	225
(e) Cement-bound curtain cutoff	225
(f) Slurry trench cutoff	226
(g) Grouting	231
(h) Upstream blankets	231
(i) Downstream embankment zones for pervious foundations	232
(j) Toe drains and drainage trenches	236
(k) Pressure-relief wells	237
132. Designs for sand and gravel foundations	239
(a) General	239
(b) Case 1—Exposed pervious foundations of shallow depth	241
(c) Case 1—Exposed pervious foundations of intermediate depth	242
(d) Case 1—Exposed pervious foundations of great depth	243
(e) Case 2—Covered pervious foundations	244
(f) Summary of pervious foundation treatments	245
133. Methods of treatment of silt and clay foundations	246
(a) General	246
(b) Saturated foundations	246
(c) Relatively dry foundations	247

Chapter VI—Earthfill Dams—Continued

C. FOUNDATION DESIGN—Continued

Section	Page
134. Designs for silt and clay foundations	249
(a) Saturated foundations	249
(b) Relatively dry foundations	250
D. EMBANKMENTS	
135. Fundamental considerations	254
136. Pore-water pressure	257
137. Seepage through embankments	258
138. Stability analyses	259
139. Embankment design	260
(a) Utilization of materials from structural excavation	260
(b) Embankment slopes, general	261
(c) Diaphragm type	262
(d) Homogeneous type	264
(e) Zoned embankment	264
140. Seismic design	268
E. EMBANKMENT DETAILS	
141. Crest design	270
(a) General	270
(b) Width	270
(c) Drainage	270
(d) Camber	270
(e) Surfacing	271
(f) Safety requirements	271
(g) Zoning	271
(h) Typical crest details	271
142. Freeboard	271
143. Upstream slope protection	274
(a) General	274
(b) Selection of type of protection	274
(c) Dumped rock riprap	275
(d) Hand-placed rock riprap	279
(e) Concrete paving	279
(f) Soil-cement	280
144. Downstream slope protection	281
145. Surface drainage	282
146. Flared slopes at abutments	283

Chapter VI—Earthfill Dams—Continued**F. DESIGN EXAMPLES OF SMALL EARTHFILL DAMS**

Section	Page
147. General	283
148. Maximum sections	283
(a) Amarillo Regulating Reservoir	283
(b) Cawker City dike	283
(c) Big Sandy dike	284
(d) Carpinteria Reservoir dike	286
(e) Carter Lake Dam No. 3	287
(f) Crane Prairie Dam	287
(g) Crescent Lake Dam	288
(h) Dickinson Dam	288
(i) Dry Falls Dam	288
(j) Fruitgrowers Dam	289
(k) Howard Prairie Dam	289
(l) Lion Lake dikes	290
(m) Lovewell Dam	290
(n) Eklutna Dam	290
(o) Lower Two Medicine Dam	290
(p) Olympus Dam	291
(q) Picacho North Dam	291
(r) Picacho South Dam	292
(s) Pishkun dikes	292
(t) Lubbock Regulating Reservoir	292
(u) Shadow Mountain Dam	292
(v) Soda Lake dike	292
(w) Stubblefield Dam	292
(x) Tiber dike	294
(y) Sheep Creek Barrier Dam	297
(z) Wasco Dam	297

G. BIBLIOGRAPHY

149. Bibliography	297
-----------------------------	-----

Chapter VII—Rockfill Dams**A. GENERAL**

150. Origin and usage	301
151. Definition and types of rockfill dams	302

Chapter VII—Rockfill Dams—Continued**B. FOUNDATION DESIGN**

Section	Page
152. Foundation requirements and treatment	303
153. Membrane cutoffs	303

C. EMBANKMENT DESIGN

154. Selection of rock materials	305
155. Embankment sections	308
156. Placement of rockfill materials	311
157. Seismic design	313

D. MEMBRANE DESIGN

158. Impervious central core	314
159. Reinforced concrete	315
160. Asphaltic concrete	319
161. Steel	322
162. Timber planking	326

E. BIBLIOGRAPHY

163. Bibliography	327
-----------------------------	-----

Chapter VIII—Concrete Gravity Dams**A. INTRODUCTION**

164. Origin and development	329
165. Scope of discussion	330

B. FORCES ACTING ON THE DAM

166. General	331
167. Water pressure	331
(a) External	331
(b) Internal or uplift pressure	332
168. Silt pressure	333
169. Ice pressure	333
170. Earthquake	335
(a) General	335
(b) Horizontal earthquake	336
(c) Vertical earthquake	337
171. Weight of structure	337
172. Reaction of foundation	337

C. REQUIREMENTS FOR STABILITY

173. General	338
------------------------	-----

Chapter VIII—Concrete Gravity Dams—Continued

C. REQUIREMENTS FOR STABILITY—Continued

Section	Page
174. Overturning	338
175. Sliding	338
176. Overstressing	339

D. DAMS ON PERVIOUS (SOIL) FOUNDATIONS

177. General	339
178. Aprons	340
179. Cutoff walls	340
180. Filters and drains	340
181. Uplift and seepage	340

E. DETAILS OF LAYOUT AND DESIGN

182. General	342
183. Nonoverflow sections	343
184. Overflow sections	343

F. BIBLIOGRAPHY

185. Bibliography	344
-----------------------------	-----

Chapter IX—Spillways

A. GENERAL

186. Function	345
187. Selection of inflow design flood	345
(a) General considerations	345
(b) Inflow design flood hydrographs	347
188. Relation of surcharge storage to spillway capacity	348
189. Flood routing	348
190. Selection of spillway size and type	350
(a) General considerations	350
(b) Combined service and auxiliary spillways	354
(c) Emergency spillways	355

B. DESCRIPTION OF SERVICE SPILLWAYS

191. Selection of spillway layout	356
192. Spillway components	356
(a) Control structure	356
(b) Discharge channel	357

Chapter IX—Spillways—Continued

B. DESCRIPTION OF SERVICE SPILLWAYS—Continued

Section	Page
(c) Terminal structure	357
(d) Entrance and outlet channels	358
193. Spillway types	359
(a) General	359
(b) Free overfall (straight drop) spillways	359
(c) Ogee (overflow) spillways	360
(d) Side channel spillways	361
(e) Chute (open channel or trough) spillways	361
(f) Conduit and tunnel spillways	362
(g) Drop inlet (shaft or morning glory) spillways	362
(h) Baffle apron drop spillways	363
(i) Culvert spillways	368
(j) Siphon spillways	368
194. Controlled crests	370
(a) General	370
(b) Flashboards and stoplogs	371
(c) Rectangular lift gates	371
(d) Radial gates	372

C. HYDRAULICS OF CONTROL STRUCTURES

195. Shape for uncontrolled ogee crest	372
196. Discharge over an uncontrolled overflow ogee crest	373
(a) General	373
(b) Pier and abutment effects	373
197. Coefficient of discharge for uncontrolled ogee crests	373
(a) Effect of depth of approach	373
(b) Effect of heads differing from design head	376
(c) Effect of upstream face slope	376
(d) Effect of downstream apron interference and downstream submergence	376

Chapter IX—Spillways—Continued

C. HYDRAULICS OF CONTROL STRUCTURES—Con.

Section	Page
198. Examples of designs of uncontrolled ogee crests	379
(a) Example 1	379
(b) Example 2	383
199. Uncontrolled ogee crests designed for less than maximum head . .	383
200. Gate-controlled ogee crests	384
201. Discharge over gate-controlled ogee crests	385
202. Side channel spillways	385
(a) General	385
(b) Design example	388

D. HYDRAULICS OF FREE-FLOW DISCHARGE CHANNELS

203. General	390
204. Open channels	392
(a) Profile	392
(b) Convergence and divergence	392
(c) Channel freeboard	393

E. HYDRAULICS OF TERMINAL STRUCTURES

205. Deflector buckets	393
206. Hydraulic jump basins	394
(a) General	394
(b) Basin design in relation to Froude numbers	396
(c) Rectangular versus trapezoidal stilling basin	397
(d) Basin depths versus hydraulic heads	397
(e) Tailwater considerations	401
(f) Stilling basin freeboard	403
207. Submerged bucket dissipators	403
208. Examples of designs of a stilling basin and an alternate submerged bucket dissipator	405
209. Impact type stilling basins	408
210. Plunge pools	408

F. HYDRAULICS OF SPILLWAYS

211. Free overfall (straight drop) spillways	410
(a) General	410

Chapter IX—Spillways—Continued

F. HYDRAULICS OF SPILLWAYS—Continued

Section	Page
(b) Hydraulic jump basin	410
(c) Impact block type basin	412
(d) Slotted grating dissipator	412
(e) Example of design of a free overfall spillway	412
212. Drop inlet (shaft or morning glory) spillways	415
(a) General characteristics	415
(b) Crest discharge	415
(c) Crest profiles	416
(d) Transition design	417
(e) Conduit design	424
(f) Design example	425
213. Culvert spillways	430
(a) General	430
(b) Circular conduit with vertical headwall	433
(c) Box culvert with vertical or warping inlet walls	434
(d) Conduit pressures	435
(e) Antivortex devices	436
(f) Energy dissipators	436
(g) Design examples	437
214. Siphon spillways	438

G. STRUCTURAL DESIGN DETAILS

215. General	439
216. Crest structures and walls	440
217. Open channel linings	442
218. Miscellaneous details	446
(a) Cutoffs	446
(b) Backfill	446
(c) Riprap	446

H. BIBLIOGRAPHY

219. Bibliography	447
-----------------------------	-----

Chapter X—Outlet Works

A. GENERAL

220. Functions of outlet works	449
221. Determination of required capacities	451

Chapter X—Outlet Works—Continued

A. GENERAL—Continued

Section	Page
222. Outlet works position in relation to reservoir storage levels	455
223. Conditions which determine outlet works layout	456
224. Arrangement of outlet works	456
225. Location of outlet works controls	459
(a) General	459
(b) Control at upstream end of conduit	459
(c) Control at intermediate point along conduit	460

B. OUTLET WORKS COMPONENTS

226. General	461
227. Waterways	461
(a) Open channels	461
(b) Tunnels	462
(c) Cut-and-cover conduits	462
228. Controls	463
(a) Control devices	463
(b) Arrangement of controls	463
(c) Control and access shafts	464
(d) Control houses	464
229. Intake structures	465
230. Terminal structures and dissipating devices	466
231. Entrance and outlet channels	467

C. HYDRAULIC DESIGN

232. Nature of flow in outlet works	467
233. Open channel flow in outlet works	467
234. Pressure flow in outlet conduits	469
235. Pressure flow losses in conduits	471
(a) General	471
(b) Friction losses	471
(c) Trashrack losses	472
(d) Entrance losses	472
(e) Bend losses	472
(f) Transition losses	473
(g) Gate and valve losses	473
(h) Exit losses	473
236. Transition shapes	473
(a) Entrances	473
(b) Contractions and expansions	474
(c) Exit transitions	474

Chapter X—Outlet Works—Continued

C. HYDRAULIC DESIGN—Continued

Section	Page
237. Terminal structures	477
(a) General	477
(b) Plunge basins	477
(c) Stilling wells	477
238. Chart for estimating pressure conduit sizes	477
239. Design examples	482
(a) Example 1	482
(b) Example 2	483

D. STRUCTURAL DESIGN DETAILS

240. General	485
241. Tunnel details	486
242. Cut-and-cover conduit details	489
(a) General	489
(b) Cutoff collars	489
(c) Conduit joints	492
(d) Design loads	495
243. Details of typical structures	496

E. BIBLIOGRAPHY

256. Bibliography	519

Chapter XII—Maintenance and Operation

A. GENERAL

257. Inspections and schedule of observations	521
258. Maintenance and operating instructions	521

B. INSPECTION AND MAINTENANCE OF DAMS

259. Earthfill dams	521
(a) General information	521
(b) Inspection of embankments and foundations	521
260. Concrete dams and concrete structures	522
(a) General information	522
(b) Inspection of concrete structures	522
(c) Inspection of channels and surrounding areas	522
261. Mechanical equipment	523
262. Reporting of abnormal developments	523

C. OPERATION

263. Storage dams	523
264. Diversion dams	523
265. Flood detention reservoirs	524
266. Changes in operating plan	524
267. Coordination of multiple uses	524

Appendix A—Estimating Rainfall Runoff from Soil and Cover Data

A- 1. Introduction	527
A- 2. Hydrologic soil groups	527
(a) Purpose	527

Appendix A—Estimating Rainfall Runoff from Soil and Cover Data—Con.

Section	Page
(b) Determination of hydrologic soil groups	528
(c) Soil arrays	528
A- 3. Land use and treatment classes	529
(a) Purpose	529
(b) Crop rotations	529
(c) Native pasture and range	529
