FRONT COVER:

Hengifoss, E-Iceland. (Ingo Wershofen)

BACK COVER:

Left: Dynkur, Þjórsá. (Ágúst Guðmundsson)
Right: Hveravellir. (Ari T. Guðmundsson)

©PUBLISHED BY:

The Icelandic National Committee on Large Dams, 1989
National Energy Authority
The National Power Company
Design: Hermóður Sigurðsson / Ísafold
Printed by: Ísafoldarprentsmiðja Ltd., Reykjavík

AVAILABLE THROUGH:

Landsvirkjun (The National Power Company), Háaleitisbraut 68, IS - 103 Reykjavík,
tel. 354-1-600700, telex 2054, telefax 354-1-687469
Orkustofnun (National Energy Authority), Grensásvegur 9, IS - 108 Reykjavík,
tel. 354-1-83600, telex 2339 Orkust is, telefax 354-1-688896

The book is printed using 3.5/4.5 mm Stempel Shadow letter's (Linotype):
The paper used is 130 g/m² G-print Gloss from Pappers Gruppen, Sweden.
Colour separations are done by Valdimar Sverrisson of Litgreining in Kópavogur.

CONTENTS

PREFACE AND INTRODUCTION	6-7		
1. ENERGY POTENTIAL IN ICELAND	9		
- Introduction	9		
- Assessment of hydropower	10		
- Assessment of geothermal energy	12		
- A high consumption rate	12		
2. THE PHYSICAL BACKGROUND	15		
- Geology	15		
- Geomorphology	17		
- Geological engineering	18		
- Hydrology	20		
- The environment and power resources	27		
3. HYDROPOWER IN ICELAND	31		
- The early history: An outline	31		
- The early projects	32		
- Raforkumálastjóri and Rafmagnsveitur ríkisins	35		
- Landsvirkjun - The National Power Company	35		
- Orkustofnun and the Energy Act of 1967	38		
- The present hydropower status	39		
- The utilization of hydropower	41		
- Cost estimates of hydropower	42		
4. DAMS AND HYDROELECTRIC PROJECTS	43		
- Skeiðsfoss dam	44		
- The small power plants	46		
- The Þjórsá-Tungnaá basin	46		
- Búrfell hydroelectric project	49		
- Þórisós and Kaldakvísl dams	49		
- Sigalda hydroelectric project	52		
		- Hrauneyjafoss hydroelectric project	53
		- Sultartangi dam	54
		- Kvislaveita diversion project	56
		- New and potential hydropower projects	58
		- Blanda hydroelectric project	59
		- Búrfell II hydroelectric project	62
		- Sultartangi hydroelectric project	63
		- Vatnsfell project	63
		- Villinganes hydroelectric project	64
		- Fljótsdalur hydroelectric project	64
		- Export of knowledge	66
		5. GEOTHERMAL ENERGY IN ICELAND	69
		- The early history: An outline	69
		- Further development	70
		- The present geothermal status	73
		- Utilization of geothermal energy	75
		6. GEOTHERMAL ENERGY PROJECTS	81
		- Hitaveita Reykjavíkur	82
		- Hitaveita Suðurnesja	85
		- Krafla power station	87
		7. POWER INTENSIVE INDUSTRIES	89
		- Historical outline	89
		- The role of power intensive industries	91
		- Current and future prospects	92
		SELECTED REFERENCES	95
		INDEX	96
		LIST OF ADVERTISERS	97
