CONTENTS

1	INTRODUCTION	1
1.1	History of Research Efforts	1
1.2	Process of Compilation	3
1.3	Scope, Hierarchic System, and Methodology of Assessment	4
1.3.1	Scope of assessment	4
1.3.2	Hierarchic system of assessment	4
1.3.3	Methodology of assessment	4
1.4	The Laws, Regulations and Agencies Related to Environmental Protection	6
1.4.1	The laws and regulations related to environmental protection	6
1.4.2	Agencies for environmental protection	7
2	OBJECTIVES AND SCENARIO ALTERNATIVES OF THE PROJECT ...	8
2.1	Objectives	8
2.2	Comparison and Selection of Project Alternatives	8
2.2.1	Comparison and selection of NPL scenarios	8
2.2.2	Comparison and selection of the dam sites	9
3	PROJECT DESCRIPTION	10
3.1	Project Layout	10
3.2	Schedule, Work Quantities, and Investment in Construction of the Project	10
3.2.1	Construction schedule	10
3.2.2	Major work quantities of the Project	12
3.2.3	Investment estimation	12
3.3	Reservoir Characteristics and Operating Mode	12
3.3.1	Reservoir characteristics	12
3.3.2	Reservoir operating mode	13
3.4	Variation in Hydrological and Sediment Regime	14
3.5	Reservoir Impoundment and Resettlement	15
3.6	Major Benefits from the Project	16
3.7	Major Environmental Benefits	17
4	ENVIRONMENTAL BACKGROUND	18
4.1	Environmental Setting of the Basin	18

4.2	Environmental Setting of the Reservoir Area	19
4.3	Major Environmental Problems in the Basin and the Reservoir Area	21
4.3.1	Soil erosion in the upper basin	21
4.3.2	Ecological and environmental issues in the reservoir area	21
4.3.3	Flood and waterlogging in the plain region of the middle and lower basins	22
4.3.4	Schistosomiasis	23
4.3.5	Ecology and environment of the lower reaches and the estuary	24
5	ASSESSMENT OF IMPACTS ON THE NATURAL ENVIRONMENT	25
5.1	Local Climate	25
5.1.1	Climatic features in the reservoir area	25
5.1.2	Prediction and assessment of impacts on the local climate	25
5.1.3	Countermeasures and suggestions	26
5.2	Water Quality	27
5.2.1	Current status	27
5.2.2	Impact prediction and assessment	28
5.2.3	Countermeasures and suggestions	29
5.3	Water Temperature	30
5.3.1	Water temperature condition of the natural river channel	30
5.3.2	Prediction and assessment of the impacts on water temperature	31
5.3.3	Countermeasures and suggestions	31
5.4	Environmental Geology	32
5.4.1	Stability analysis of the earth's crust	32
5.4.2	Reservoir induced seismicity	32
5.4.3	Reservoir bank stability	32
5.4.4	Reservoir leakage	33
5.5	Terrestrial Flora and Vegetation	33
5.5.1	Current status	33
5.5.2	Impacts on species	34
5.5.3	Countermeasures and suggestions	34
5.6	Terrestrial Fauna	34
5.6.1	Current status	34
5.6.2	Prediction and assessment of the impacts	35
5.6.3	Countermeasures and suggestions	35
5.7	Aquatic Life	35
5.7.1	Current status	35
5.7.2	Prediction and assessment of the impacts	36
5.7.3	Countermeasures and suggestions	37
5.8	Sediment Deposition in the Reservoir and Channel Scouring Downstream the Dam	38
5.8.1	Sediment inflow characteristics and regulation scheme of the reservoir	38

5.8.2	Sediment deposition and its impacts	38
5.8.3	Impacts on downstream riverbed erosion	39
5.9	Environmental Issues in the Lake Areas in the Middle Reaches	40
5.9.1	Environmental setting	40
5.9.2	Impacts on the four-lake region	41
5.9.3	Impacts on the Dongting Lake region and the Poyang Lake region	42
5.9.4	Countermeasures and suggestions	42
5.10	Ecological and Environmental Issues in the Estuary Region	42
5.10.1	Impacts on estuarine runoff	42
5.10.2	Impacts on salt-water intrusion in the estuary	43
5.10.3	Impacts on the trend of soil salinization in the estuarine delta	43
5.10.4	Impacts on sedimentation and erosion in the estuary	43
5.10.5	Impacts on nutrients and fishery in the estuary and the coastal areas	44
5.10.6	Countermeasures and suggestions	44
6	ASSESSMENT OF IMPACTS ON THE SOCIAL ENVIRONMENT	45
6.1	Reservoir Inundation and Resettlement	45
6.1.1	General description of the inundation and resettlement	45
6.1.2	Assessment of impact of resettlement on the environment	47
6.1.3	Countermeasures and suggestions	48
6.2	Public Health	48
6.2.1	Schistosomiasis	48
6.2.2	Malaria	49
6.2.3	Impacts on prevalence of other diseases	49
6.2.4	Impacts of construction and resettlement on public health and countermeasures	50
6.3	Natural Landscape and Historic Relics	51
6.3.1	Features of natural landscape and historic relics	51
6.3.2	Impacts on the natural landscape	51
6.3.3	Impacts on historic relics and cultural heritages	52
6.3.4	Countermeasures and suggestions	53
6.4	Impacts of Construction on the Environment	53
6.4.1	The layout of construction and its features	53
6.4.2	Environmental background	54
6.4.3	Impacts of construction	54
6.4.4	Countermeasures	56
7	ENVIRONMENTAL ISSUES OF PUBLIC CONCERNS	58
7.1	Whether will Construction of the Three Gorges Project Aggravate the Upstream Flood Damage	58
7.2	Species and Their Habitats	59
7.3	Soil Erosion Control in the Upper Basin and Construction of the Shelter Forests in the Middle and Upper Basins of the Yangtze River	59

7.4	Solid Wastes Arbitrarily Piled up Along the Banks of the Reservoir	60
7.5	Analysis for Impacts of a Dam-breaking	60
7.6	Impacts on the Environment in Chongqing City	61
8	PUBLIC PARTICIPATION	62
8.1	Participation of the Affected Public	62
8.2	Participation of Experts	62
8.3	Participation of the Political Groups	63
8.4	Participation of the News Media	63
9	ENVIRONMENTAL AND ECOLOGICAL MONITORING AND MANAGE- MENT SYSTEM	64
9.1	Environmental and Ecological Monitoring System	64
9.1.1	Main tasks	64
9.1.2	Objectives of monitoring	65
9.1.3	Main parameters to be monitored	65
9.1.4	Structure of the monitoring system	66
9.2	Environmental Management System and Its Responsibility	66
9.2.1	Setting up an authorized system for ecological and environmental man- agement	66
9.2.2	Enacting laws, policies and regulations for the environmental protection in the Three Gorges Project	66
10	FUNDS FOR ENVIRONMENTAL PROTECTION	67
11	CONCLUSIONS, COUNTERMEASURES AND SUGGESTIONS	69
11.1	Conclusions	69
11.2	Countermeasures and Suggestions	71
	POSTSCRIPT	72
	FIGURE ON THE COVER: A Bird's-eye View of the Three Gorges Project
