

**Bulletin On Ecological and
Environmental Monitoring Results
Of the Three Gorges Project
1998**

**State Environmental Protection Administration
May 1998**

Chief compiler:

China National Environmental Monitoring Centre

Compilers :

Administrative Committee of the Yangtze River's Fishery Resources
Science and Technology Department of Resource and Environment In the
Chinese Academy of Sciences
National Climate Centre of the State Meteorological Bureau
Hubei Agri-ecology and Environment Protection Station
Chinese Academy of Preventive Medical Sciences
Environmental Protection Centre of Ministry of Transportation
Eco-environmental Monitoring Centre of Agency of Forestry
The Three Gorges Office of Hubei Province
Hubei Statistical Bureau
National Seismological Agency of China
Department of Geological Environment in Ministry of Land and Resources
Chongqing Statistical Bureau
China Yangtze Three Gorges Project Development Corporation
The Yangtze River's Water Conservancy Committee
Environmental Monitoring Station of Chongqing City
Resettlement Development Bureau, the Construction Committee of the Three
Gorges Project

Unit of Examination and Approval:

State Environmental Protection Administration

Contents

Preface

1	Introduction
2	Chapter One. Progress of the Three Gorges Project
3	Chapter Two. Introduction of the Monitoring Network
5	Chapter Three. Introduction of social Environment
5	3.1 Population and economy of the Reservoir Area
5	3.2 Resettlement in Reservoir Area
6	3.3 Population health in Reservoir Area
8	Chapter Four. State of Natural Ecological Environment
8	4.1 Climate of Reservoir Area
9	4.2 Varieties of Terrestrial Plants and Vegetation in Three Gorges Reservoir Area
12	4.3 Terrestrial Veterbrates in the Three Gorges Reservoir Area
12	4.4 Fishery Resources and Rare and Endangered Aquatic Animals
15	4.5 Agricultural Ecology of the Reservoir Area
17	4.6 Construction of Ecological Experiment Stations
20	4.7 Geological Disaster in the Three Gorges Region
22	Chapter Five. Pollution Sources and Their Emissions
22	5.1 Monitoring of Key Industrial Pollution Sources
23	5.2 Survey and Monitoring of Municipal Waste Water
24	5.3 Sruvey of Pollution Discharging From Moving-out Enterprises and Towns
24	5.4 Monitoring of Pollution Sources From Use of Agricultural Chemicals and Fertilizers in the Reservoir Area
26	5.5 Survey and Monitoring of Dynamic Pollution Sources
28	Chapter Six.Environmental Quality
28	6.1 Water Environment Quality
35	6.2 Environmental Quality in the Construction Area
39	Chapter Seven.General Conclusion
